LED & LASER SCANNING TECHNOLOGIES

With brands like Zeiss, Hexagon, Faro, PolyWorks, and Geomagic, we have the best tools for any 3D metrology requirement.

- Scan to Cad Comparisons
- Mold Verification
- Dimensional Analysis
- Virtual Assemblies
- Reverse Engineering
- PolyWorks & Scan Training
- On Site Alignments & Inspection
- Digital Twin of Artifacts

CMM Services
X-Ray & CT Scanning
Portable CMM
3D Scanning
2D Vision
Gage Certifications
Reverse Engineering
GD&T Consultation
On Site Support
PC-DMIS & PolyWorks Training
Free Quotations

HAVEN METROLOGY

INSIGHT INTO THE INSIDE
WITH
X-RAY & COMPUTED TOMOGRAPHY TECHNOLOGIES

ISO/IEC 17025:2017 Dimensional Calibration
ISO/IEC 17025:2017 Dimensional Accreditation
ASNT & NAS410 Certified for RT/CT
ITAR Registered & Compliant
NIST:800-171 & CMMC 2.0 Cybersecurity Audited
CAGE Code:

X-RAY & CT SCANNING

225kv Microfocus & 450kv High Energy Systems
For the analysis of medical microplastics to inconel aerospace castings, radiography & CT is revolutionizing how engineers understand their products.

- Part to Part & CAD Comparisons
- Porosity, Inclusions, & Cracks
- Fail / Dimensional Analysis
- Foams, Plastics, Composites, Castings
- Fault & Failure Analysis
- Wall Thickness, Clearance, Interference
- Reverse Engineering
- Fixture Certifications
- Up to 5x3ft & 500lb System Capacity

NON DESTRUCTIVE TESTING
Band saws are no longer required for inspecting internal features of your most complex parts.

MATERIAL ANALYSIS
Materials testing like porosity, inclusions, adhesion, cracks, penetration, points of failure, fitment analysis & linear density.

INCREDBILE ACCURACY
Artifact driven calibrations mean we scale system accuracy relative to a given project.

CUSTOMIZABILITY
Both our cabinet and vault are customizable and have the highest resolution sources, fastest detectors, and heaviest manipulators.

COORDINATE MEASURING MACHINES

CMMs SET THE BENCHMARK FOR ALL OTHER MEASURING DEVICES

- Dimesional Analysis
- Programming
- On Site Programming
- Fixture Certifications
- GD&T Consultations
- PC-DMIS Training
- Capability / R&R Studies
- Contact Probe Scanning

REVERSE ENGINEERING
If you have an old component with no CAD, or have modified a part to work better, we can reverse engineer a turnkey CAD model for you.

VISION SERVICES

ON SITE SERVICES & TRAINING

Hexagon Optiv Adavantage

2D APPLICATIONS
- Circuit Boards
- Inscriptions
- Graphics
- Bar & QR Codes
- Scratches
- Labels

Extreme portability & flexibility of our measuring devices and schedules means we can come to you for on site inspections, training, and demonstrations.
